REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: While Chen et al. (US 5,849,846) does address balloon rupture pressure, it is clearly taught by Chen et al. that the purpose of the irradiation is to *increase* performance characteristics such as the rupture pressure and fatigue resistance of the catheter balloon. See Chen et al., col.9, lines 21-45 and col.10, lines 9-12. Thus, even when combined with Sun et al. so that the electron beam radiation is applied to the balloon in an evacuated or inert gas-filled container, the prior art of record fails to teach or suggest a method of sterilization wherein the rupture pressure after irradiation is less than or equal to the rupture pressure before irradiation *or* a motivation to do so. In fact, Chen et al. would teach one away from achieving a rupture pressure less than or equal to the pre-irradiation rupture pressure because such a method would not be achieve the goal of increasing performance characteristics of the balloon, as taught by Chen et al..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leigh McKane whose telephone number is 571-272-1275. The examiner can normally be reached on Monday-Thursday (5:30 am-2:00 pm).
